

INSTRUCTIONS FOR UPLOADING PHOTOS:

1. Download the Onpatient application.
2. Please submit multiple high-quality photos of the areas considered for surgery **ONLY** through the OnPatient application, our secure medical patient platform.
 - Do NOT send these photos through email or text. Make sure the photos are taken in good lighting and avoid shadowing.
 - We will need several views; front, both sides, 45-degree angle views of both sides and full body length photos.
 - For references of what quality and angles for the photos, we recommend going to Dr. Cat's before and after photos on our website's Photo Gallery.
<https://beautybydr.cat.com/patient-photo-gallery/>
3. On the homepage, in the upper right-hand corner, there will be a tab called 'Messages'. Once you click on this and choose 'Send a Message,' it will ask you to fill out some information. At the bottom, once all of the fields are filled out, you will see a place to attach any files.
4. Submit photos of the areas considered for surgery.
 - Each picture will need to be attached to a separate message, so you will need to send 5-6 separate messages.
 - It is easiest to take all photos beforehand and have them ready in your camera roll to upload directly to the OnPatient App.
 - If you do not have anyone to take your photos for you, you can use the self-timer feature on your phone. Photos taken from the front camera or "selfie mode" will be too low quality to submit.
